MANGROVE SWAMP CRUISE (SIC)

TOUR DESCRIPTION
(Tour Duration: Approximately 3 Hours)
This tour explores the many branches of the Santubong and Salak River Delta system as they emerge into the South China Sea. It focuses on the complex ecosystem of the mangrove swamp, which is an important breeding ground for many marine animal species, and a permanent home for small reptiles, mudskippers, crabs, shellfish and occasional mammals such as monkeys and lorisises. The mangroves are also important feeding grounds for a rich array of bird life. Visitors will see many different type of mangrove, and learn how these uniquely adapted trees colonise the shoreline and develop a complex, symbiotic ecosystem. There will also be a stopover at a Malay fishing village and charcoal factory set deep in the mangrove forest.

NOTE: Tour includes one lunch. Flat walking shoes and cap or hat are recommended
